DOUALA

## JUNIOR WORDPRESS WEB DEVELOPER

At only 22 years old, I have already obtained a certificate in dynamic website creation with WordPress, which allowed me to discover the exciting world of web design, content management, and user experience.

Curious and self-taught, I strengthened my skills with solid foundations in HTML, CSS, and I am actively pursuing my learning to become a well-rounded developer, comfortable with both front-end and back-end.

My goal is clear: to master modern web development technologies in order to design interactive, high-performing platforms tailored to users' needs

## AREA OF INTEREST
